The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity

June 2, 2021
Susan B. Hassmiller, PhD, RN, FAAN, RWJF Senior Advisor for Nursing, and Senior Scholar-in-Residence, National Academy of Medicine

@suehassmiller
We’ve strengthened education, advanced practice, promoted leadership and increased workforce diversity

**Goal:** Leverage the capacity of the nursing workforce to advance health equity
Committee Vision:

The achievement of health equity in the United States built on strengthened nursing capacity, diversity and expertise.
Health Inequities

Health is influenced by:

- Jobs that pay a living wage
- Safe housing
- Reliable transportation
- Walkable neighborhoods
- Good schools
- Fresh food
- Adequate green spaces
Inequities and Structural Racism

Root cause of disproportionate COVID deaths: structural racism

- Housing
- Education
- Health care
- Employment
- Public safety
- Criminal justice
COVID-19 and Inequities

- Structural inequities and stress from experiencing racism lead to poorer physical and mental health
- Black and Indigenous people experience more chronic health conditions sooner, putting them at higher risk for COVID
COVID-19 and Inequities

Being able to protect yourself from COVID depends on your income, access to health care, ability to work from home, and how crowded your house is.
We must acknowledge, confront and dismantle systems of structural racism, including in nursing.

Key Takeaways and Recommendations

www.nap.edu/nursing2030
The Report’s Key Takeaways

For our country to advance health equity for all, the systems that educate, pay, and employ nurses need to:

1) Permanently remove nurse practice barriers
2) Value nurses’ contributions
3) Prepare nurses to tackle and understand health equity
4) Fully support nurses
Takeaway 1: Permanently Remove Nurse Practice Barriers

Nurses can bridge gap in providing high-quality, accessible care

- More likely to practice in primary care and work in urban and rural areas
- Expand maternal and pediatric care, mental health care, and telehealth
- Manage and coordinate team-based care
Takeaway 1: Permanently Remove Nurse Practice Barriers

Recommendation:
All organizations, including state and federal entities and employing organizations, should enable ALL nurses to practice to the full extent of their education and training by removing:

• Regulatory and public and private payment limitations
• Restrictive policies and practices
Takeaway 2: Value Nurses’ Contributions

Payment systems do not explicitly value nurses’ care contributions:

- Current system rewards volume and treating illness – not prevention, health promotion, primary care and community/public health
- Nurses’ roles in transitional care, care management and care coordination not captured

Recommendation: Payers and public health agencies should establish sustainable and flexible payment mechanisms to support nurses in health care and public health, including school nurses, in advancing health equity
Takeaway 3: Prepare Nurses to Tackle Health Equity

Nurses will need to be educated to:

• Understand complex factors that affect health
• Care for an aging and diverse population
• Engage in new professional roles
• Adapt to new technologies
• Collaborate with other professions and sectors
• Function in changing policy environment
Takeaway 3: Prepare Nurses to Tackle Health Equity

Address systemic racism within nursing

Nursing students and faculty must reflect the diversity of the population and break down barriers of structural racism present in nursing education.

Nursing schools should:

- Cultivate an inclusive environment
- Recruit and admit diverse students
- Provide students with support and mentorship
- Ensure that all nurses practice culturally humility and are aware of their biases
Recommendations:

• Nursing schools need to integrate content about the drivers of health, health inequities, and population health concepts throughout the curriculum

• Schools should expand community learning opportunities

• Increase number of PhDs focused on health equity
Takeaway 4: Fully Support Nurses

Pandemic has exacerbated nurses’ moral distress

Spring 2020
- Nurses Who Feel Overwhelmed
- Nurses Who Don’t Feel Overwhelmed

Dec-20
- Nurses Who Feel Exhausted
- Nurses Who Are Not Exhausted

Source: American Nurses Foundation Survey of 12,000 nurses
Takeaway 4: Fully Support Nurses

Address and eliminate racism in our workplaces. Our workplaces should:

- Reflect the population we serve
- Recruit, retain, mentor, and promote nurses from underrepresented backgrounds
- Advance nurses of color to leadership positions

Everyone should practice cultural humility and be aware of biases
Takeaway 4: Fully Support Nurses

Recommendation: By 2021, nursing education programs, employers, nursing leaders, licensing boards, and nursing organizations should initiate the implementation of structures, systems and evidence-based interventions to promote nurses’ health and well-being.
Creating a Shared Agenda

Recommendation: In 2021, all national nursing organizations should initiate work to develop a shared agenda for addressing the social determinants of health and achieving health equity

- Tri-Council
- Council of Public Health Nursing Organizations
- Federal Nursing Service Council
- National Coalition of Ethnic Minority Nurse Associations
Answering the Call

“New and established nurse leaders – at all levels and in all settings – are needed to lead change that results in...achieving equity in health and health care”
